## Medsonix of Naples Partners Up with ACE CLASSIC

### Revolutionary sound technology helps area golfers ‘*Drive Away Pain.*’

**Naples, FL February 5, 2010** – Medsonix of Naples, offering the revolutionary Medsonix acoustic therapy, has announced their partnership with the ACE GROUP CLASSIC. All Tour players have been invited to experience this breakthrough for themselves.

The Medsonix Therapy is a low-frequency acoustic modality that is non-invasive, painless, and drug-free. There is no disrobing. Clients simply sit in comfortable chairs, relax and listen to soothing music while a low-frequency sound wave permeates their entire body for 30 minutes. Most importantly, in more than 10 years, there have been NO negative side-effects.

Local residents and golfers have eliminated pain from a variety of physical problems and are experiencing the game anew by swinging pain free, in many cases for the first time in decades. Local resident Dr. Gary Gordon is very excited about the opportunity to introduce this revolutionary therapy to professionals who make their living playing the game after seeing the results from local amateurs.

“We’re very excited about our new partnership with the ACE Group Classic. We know the positive effect of Medsonix is profound, immediate, long-lasting and measurable,” says Dr. Gordon, founder of the first center in SWFL. “In university pilot studies conducted at UNLV, the multi-patented technology was confirmed scientifically to undeniably increase blood flow, decrease pain and inflammation while improving range of motion. This is a must for players of any skill level but of critical importance for the elite professional athletes on the Champions Tour and every golf tour for that matter.”

Medsonix of Naples has secured the ACE Group Classic parking lot sponsorship. Information about the Medsonix therapy will be distributed to every attendee upon their arrival. A special reduced treatment fee will be

offered to all ACE attendees who register at their booth. They'll also be automatically entered in the Daily Drawings for valuable golf prizes!

Local resident Charles C., a 20 handicapper, came to Medsonix of Naples experiencing extreme hip and wrist pain, barely finishing his round the previous Saturday. After just one session, the pain was completely gone from his hip enabling him now to climb in and out of bunkers with ease, experience zero discomfort while rotating his hips and now makes ball contact pain-free. Charlie says his experience was "dramatic."

Ken B., an 8 handicapper, was referred to Medsonix by a golf partner. A right handed player, he's suffered from excruciating pain in his left shoulder for years unable to fully extend his left arm down and through the swing path causing topped tee shots and the always lurking "duck hook." After his first Medsonix session, he experienced some relief. After his second session, the pain was gone and he had total range of motion. Ken stated he was "really happy with the results and can't wait to play Saturday counting on longer and straighter drives and more accurate approach shots from the lack of pain!"
